

## **Pothole Sealing TL Modification (FAQ):**

**Question: What is the Pothole Sealing TL Modification?**

**Answer:** This modification is a cold mixture of 10 to 15% TL-2000 and 85 to 90% gravel of 5 to 7 mm size.

**Question: What is the procedure of pothole sealing?**

**Answer:** The material is placed into a pothole to fill it completely and then rolled on the top with a motor roller. After the drying period of 2 to 3 hours, the road may be re-opened for traffic.

**Question: What potholes can be sealed with the material?**

**Answer:** The sealing material is suitable for various potholes of any size.

**Question: Where can I find more information on the Pothole Sealing TL Modification and other HALIK products?**

**Answer:** You can find contact information and more information on TL-2000 and other HALIK products on the HALIK website at [www.halik.biz](http://www.halik.biz)
